ABOUT ME

Final-year BCA student at Christ Academy (Expected June 2026) with hands-on experience building AI-powered systems — from offline LLM agents to OCR automation pipelines. Experienced with Claude, Gemini, Groq, and Ollama APIs; trained in prompt engineering; comfortable identifying high-value automation opportunities by working directly with non-technical teams. I ship working systems, not pilots.

TECHNICAL SKILLS & EXPERTISE

AI & Model Expertise: Claude API, Claude Code, Gemini API, Groq, Ollama, OpenAI API, GPT models, Whisper STT, Piper TTS, LLM Prompt Engineering, AI Agent Architecture, RAG, Vector Memory, Multi-model Orchestration
Programming & Frameworks: Python, Core Java, Android, HTML, CSS, JavaScript, React, Node.js, Flutter, Dart
Databases & Tools: SQL, SQLite, MongoDB, REST APIs, Git & GitHub, Firebase, VS Code, Android Studio, Eclipse IDE, Streamlit, Jupyter Notebook, Pandas, NumPy, MS Office

PROJECTS

StockBridge — Full-Stack SaaS POS & Inventory System 2026

React 19, Node.js, Express.js, MongoDB, REST API, JWT, Groq, LLaMA 3.3, i18next

Link: github.com/nandeesh2799/StockBridge

- Production-ready SaaS POS featuring 15+ REST API endpoints, JWT authentication, rate limiting, and role-based access control (Owner, Manager, Cashier).
- Integrated an AI business assistant (Groq LLaMA 3.3 70B) utilizing live shop data, multi-turn memory, and multilingual support (English, Hindi, Kannada) for real-world production workflow.
- Developed offline-first billing capabilities with auto-synchronization, dynamic UPI QR code generation, WhatsApp invoice sharing, and PDF downloading.

Aria — Desktop AI Companion & Automation Agent 2026

Electron, React, Vite, Ollama, Whisper STT, Piper TTS, SQLite, Claude API, Gemini API

Link: github.com/nandeesh2799/AI-Companion

- Built an offline desktop AI agent featuring a transparent overlay, animated character, and persistent SQLite-based vector memory.
- Implemented multi-model orchestration (Claude, Gemini, Groq, Ollama) with auto-fallback mechanisms, Whisper Speech-to-Text (STT), and Vision Mode for internal AI tooling.
- Orchestrated end-to-end agent pipeline flow: input capture → model routing → memory retrieval → response → TTS output.

OCR Payment Extraction Pipeline 2025

Python, PyMuPDF, Tesseract, pandas, openpyxl

- Automated the extraction of UPI transaction data from bulk payment screenshot PDFs, achieving zero manual entry and a 100% success rate.
- Designed workflow mirroring industry AI implementation: bottleneck identification → automation development → structured Excel report verification.

UPS Service Manager — Flutter Mobile App 2026

Flutter, Dart, Firebase Auth, Firestore, Provider, Material 3

Link: github.com/nandeesh2799/UPS-Service-technician

- Developed a production-ready mobile application for UPS repair technicians to manage customers, service order CRUD operations, warranty alerts, and WhatsApp integration.
- Built utilizing Firebase Authentication, Cloud Firestore, clean architecture (separating models, providers, services, and UI screens), and Material 3 theme switching.

Expense Tracker Android App 2026

Java, Android Studio, SQLite, Material Design

Link: github.com/nandeesh2799/ExpenseTrackerAndroid

- Built native Android application with income/expense tracking, category summaries, monthly budget limits with progress indicators, and custom local push notifications.
- Created custom SQLite DAO layer featuring parameterized queries, cursor-based result handling, and full CRUD capability.

AgriTech Website — 1st Place Hackathon 2024

HTML, CSS, JavaScript

- Designed and coded a responsive farming-assistance website, winning 1st Place among competing college teams.

EDUCATION

Bachelor of Computer Application (BCA) Expected June 2026

Christ Academy, Bengaluru

Pre-University (Science / Commerce) 2021 – 2023

Krupanidhi PU College, Bengaluru

ACHIEVEMENTS, VOLUNTEERING & CERTIFICATIONS

- **1st Place – College Hackathon (2024)**: Built AgriTech website; topped among all competing college teams.
- **Finalist – Departmental Coding Contest (2024)**: Ranked in top positions among 50+ participants.
- **Tech Volunteer – College IT Fest, Christ Academy (Jul 2024)**: Managed technical operations for the annual IT event.
- **Event Volunteer – Utkarsh, Christ Academy (Sep 2023)**: Volunteered for cultural and academic fest.
- **Certifications**: Software Engineering (Infosys Springboard), Prompt Engineering (Certified Practitioner), Networking & Web Tech (Infosys Springboard).
- **Languages**: English, Kannada, Hindi.
